Subject: Microsoft Complaint

DOJ-

January 2, 2002

If you can recall, about the time you took Microsoft to court is when the stock market went to hell. You've had enough time to investigate their actions so now lets get into the penalty phase. Microsoft has erred, but it has helped the United States and the World get into the new computer world. Without Microsoft, it may have been another 20 years in finding somebody to get it started. That name might have been IBM!

Sincerely
Len Tralmer
